

MORSE TUTOR - Setting up / Troubleshooting Sound

If Morse Tutor is working, but no sound is played, it is likely that you need to enable the PC Speaker. In Windows XP, this property screen is found by looking in the *Control Panel*, and then in *Sounds and Audio*. Select the *Volume* tab, and click the *Advanced* button to reach the screen below.

Morse Tutor plays sound via the PC Speaker.

Set your desired volume

Make sure this output is **not** muted

If you cannot see the PC Speaker option in the Mixer Control above...
Open the properties box, reached from the *Options* menu item.
Make sure that the PC Speaker channel is enabled.
